Re: Joint Proposal on Management Actions for the Bluenose-East Barren-ground caribou (Sahti ekwq)

The Délı̨nę Renewable Resources Council (DRRC) is requesting an extension for the comment period surrounding the proposal to open the harvest for Bluenose East caribou to cows as well as bulls. As you know, summer is a challenging time to solicit feedback from community members, but with a recent election in the community and several other events taking place it will be exceedingly difficult to organize an additional community meeting. Given the importance of the issue to citizens of Délı̨nę, it is important for the DRRC to solicit feedback from community members to guide our response and participation in this process.

Please feel free to contact the DRRC if you have any questions surrounding this request,

Sincerely,

A handwritten signature in black ink, appearing to read "E. Reeves", is written over a horizontal line.

Edward Reeves
Manager
Délı̨nę Renewable Resources Council
