Wildlife Research Permit Application – Tłıchq All-Season Road (Tłıchq Highway) Wildlife Studies

As per section 12.5.1 of the Tłıchq Agreement, the Wek'èezhì Renewable Resources Board (WRRB) considers the above-mentioned Wildlife Research Permit application as a management proposal. The Board understands that the objective of the camera trapping program is to document boreal caribou and their predators along the proposed TASR.

The proposed research, scheduled for January 1 to December 31, 2022, along the TASR between Whatı and the junction with Highway 3, involves the following:

- Check and download data from seven previously installed remote wildlife cameras; and,
- Access cameras by truck, snowmobile, or walking.

The WRRB has no concerns with the project as presented in your application. We encourage community members with local Tłıchq knowledge to participate in the monitoring program. The WRRB requests that results be provided to the Board upon completion of work.

Please feel free to give us a call with any questions you might have.

Sincerely,

A handwritten signature in black ink that reads "Jody Pellissey" with a stylized flourish at the end.
