Re: Joint Management Proposal for Sahtı (Bluenose-East) Ekwò Herd

Dear Ms. Steinwand-Deschambeault and Mr. Croft:

As per section 12.5.1 of the Tłıchǫ Agreement, the Wek'èezhì Renewable Resources Board (WRRB) considers the above-mentioned proposal, submitted by the Tłıchǫ Government (TG) and the Government of the Northwest Territories (GNWT) on January 28, 2022, a wildlife management proposal. The Board understands the short-term goal of the management proposal is to promote conditions that will allow for the continued recovery of the the Sahtı Ekwò herd while working towards the longer-term goal of enabling a sustainable caribou harvest that meets the needs of Indigenous communities across the Sahtı herd's range.

The WRRB understands the joint management proposal to include management and monitoring actions in the following categories, as defined in the *Taking Care of Caribou Management Plan*, for July 1, 2022 to July 1, 2024: 1) harvest, 2) predators, 3) land use and habitat, 4) education, and 5) monitoring and research.

Based on the WRRB's Rule for Management Proposals, the WRRB has determined to undertake a modified Level 1 review (Motion #804-08-02-2022). This review will include the following:

- The joint management proposal will be posted to the WRRB's website on the Management Proposals page (<https://www.wrrb.ca/management-proposals>) from February 18, 2022 to April 15, 2022. This will allow sufficient time for interested Parties and the general public to provide comment. Any documents, including correspondence, will be added as related attachments.
- All interested Parties will be contacted and invited to comment on the joint management proposal via the WRRB website.
- The Board will review and make its final recommendations regarding the joint management proposal at their May 2022 board meeting.

.../Page 2

To assist the Board in making its final recommendations in May 2022, the WRRB requests that TG and GNWT provide the following information by no later than March 7, 2022:

1. Please clarify in Table 1 (p.8) whether the harvest information provided is for a region or a specific community.
2. To assist with communications and understanding, please develop and share in each Tłchq community a plain-language summary and/or poster of the joint management proposal.

The Board staff may approach TG and GNWT staff with additional questions and clarifications prior to the May 2022 board meeting.

If you have any questions, please do not hesitate to call our office.

Sincerely,

Joseph Judas
Chair
